

STATEMENT OF BASIS
MODIFICATION OF PERMIT NUMBER WA0040801
Cypress Island, Inc.

Section S2, Testing Schedule, requires testing for BOD and Ammonia all year around. The Section S1, Effluent Limitations, limits Ammonia and BOD from May 1 through October 1 exclusively. The Permittee has requested that he be relieved of testing outside the time of the limitations. This request is granted since there appears to be no compelling reason for the contrast. In addition, the testing dates for Ammonia and BOD are changed from May 1 through October 1 to May 1 through September 30 for clarity.

Testing for pH and hardness have been added in order to calculate ammonia.

Also, the name of the facility changed from Northwest Sea Farms to Cypress Island, Inc. so the permit was updated to reflect the change.
